ABOUT

Junior Front-end Developer with 1+ year of experience developing and maintaining mobile-first, fully responsive products and websites. Proficient in HTML, CSS, JavaScript and modern frameworks like React, Bootstrap. Passionate about solving logical puzzles and creating visually beautiful yet highly usable user interfaces. Pediatrician in the past with an attentive approach to details, worked in a fast-changing environment. Always seeks an opportunity to grow and gain new knowledge.

EXPERIENCE

Freelance

Front-end Developer

December 2020 – Present

- Coding mobile-first websites and landing pages with a stack of HTML5, CSS3, Sass, JavaScript, React.js and Gatsby.
- Personalising customer experience using Geocoding API and other public APIs.
- Producing and managing visual content for clients.

Karma Computing

Front-end Developer

May 2020 – Present

- Developing user interface for subscription SaaS product using HTML5, CSS3, SCSS, JavaScript, jQuery, Bootstrap and Jinja2.
- Increased the share of mobile traffic by implementing a responsive, mobile-first approach across the whole product.
- Implemented client-side validation to make the system more forgiving to user errors, which resulted in increased conversion rate.
- Engineered and implemented Bootstrap-based design system extended with reusable custom components which decreased the average feature development time.
- Improved page loading time and overall page performance by migrating from self-hosted Bulma to CDN-hosted Bootstrap framework and refactoring custom components.
